## SOLID SOLUTIONS IN MINERAL NOMENCLATURE<sup>1</sup>

Guidelines for mineral nomenclature have been recommended by the Commission on New Minerals and Mineral Names (CNMMN) of the International Mineralogical Association (IMA) and published in most of the international mineralogical journals by E. H. Nickel and J. A. Mandarino (1987–1989). But these guidelines haven't covered the question of how members of solid-solution series should be named. This aspect of mineral nomenclature, as the recommendations approved with a general consensus of the full CNMMN membership, is embodied in the present paper. Mineralogists wishing to give names to members of known solid-solution series are advised to adhere to these recommendations. Proposals for mineral names in the category of partial solid-solution series will be judged by members of the CNMMN on the merits of each particular case.
